

## Model Number: 37030A 5.1/7.1 USB Sound Card

### Description:

#### Model 10008

A multi-functional sound card designed for advanced audio processing and customization. It features a built-in high-quality microphone, dynamic sound effects, karaoke and mixer functions, and LED status indicators. It supports analog-to-digital conversion and offers rich customization options like speaker position adjustment and sound field presets, making it ideal for audio enthusiasts.

#### Model 10009

A simple and practical virtual 5.1 USB sound card that provides a quick replacement for faulty or missing sound cards. It features line-out for speakers/headphones, line-in for microphones, and is fully powered via USB. It's compatible with older Windows systems and does not require drivers, offering a straightforward plug-and-play solution for basic audio needs.

### Features:

- **USB Interface:** Both models are USB-powered and do not require an external power source, ensuring portability and ease of use.
- **Plug-and-Play:** Neither model requires driver installation, making them simple to set up and use.
- **Sound Card Replacement:** Both serve as external sound cards and can replace or supplement existing ones.
- **Support for Audio Devices:** Both models support connections for speakers or headphones and include functionality for microphone input.
- **Focus on Digital Audio:** Each product processes digital audio signals to enhance sound quality.
