User Manual

Multi-function Network Cable Tester

Model: 26031/2

- Thank you for purchasing the IP camera tester. Please read the manual before using the IP camera tester and use properly.
- For using the IP camera tester safely, please first read the「Safety Information」carefully in the manual.
- The manual should be kept well in case of reference.
- Keep the S/N label for after-sale service within warranty period. Product without S/N label will be charged for repair service.
- If there is any question or problem while using the IP camera tester, or damages occurred on the product, please contact our technical Department.

1. Safety information

◆ The tester is intended to use in compliance with the local rules of the electrical usage and avoid to apply at the places which are inapplicable for the use of electrics such as hospital, gas station etc.

◆ To prevent the functional decline or failure, the product should not be sprinkled or damped.

◆ The exposed part of the tester should not be touched by the dust and liquid.

◆ During transportation and use, it is highly recommended to avoid the violent collision and vibration of the tester, lest damaging components and causing failure.

◆Don’t leave the tester alone while charging and recharging. If the battery is found severely hot, the tester should be powered off from the electric source at once. The tester should not be charged over 6 hours.

◆ Don’t use the tester where the humidity is high. Once the tester is damp, power off immediately and move away other connected cables.

◆ The tester should not be used in the environment with the flammable gas.

◆ Do not disassemble the instrument since no component inside can be repaired by the user. If the disassembly is necessary indeed, please contact with the technician of our company.

◆ The instrument should not be used under the environment with strong electromagnetic interference.

◆ Don’t touch the tester with wet hands or waterish things.

◆ Don’t use the detergent to clean and the dry cloth is suggested to use. If the dirt is not easy to remove, the soft cloth with water or neutral detergent can be used. But the cloth should be tweaked sufficiently.

2. IP Camera Tester Introduction

2.1 General

The 5.4 inch IPS touch screen IP camera monitor is designed for maintenance and installation of IP cameras, analog cameras, TVI, CVI, AHD, SDI/EX-SDI cameras, as well as testing 4K H.264 /8K H.265 camera by mainstream, The 1920x1152 resolution enables it to display network HD cameras and analog cameras in high resolution. The unit supports many ONVIF PTZ and analog PTZ control. The combination of touch screen and key buttons make the IP camera tester very user- friendly.

2.2 Packing list

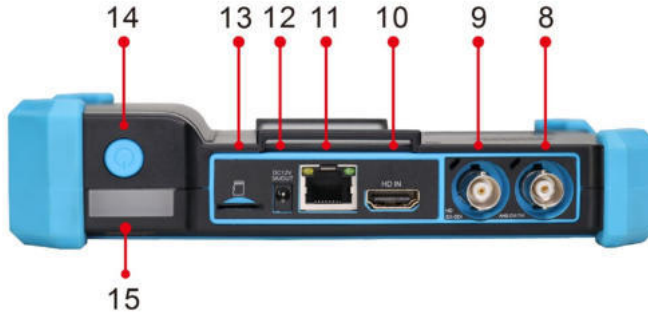

1) Tester
2) Adaptor DC12V 1A
3) Network cable tester
4) Lithium ion battery (7.4V DC 3350mAh)
5) BNC cable
6) RS485 cable
7) RJ45-BNC converter (Only for Cable tracer function)
8) Output Power cable
9) Audio cable
10) Safety cord
11) Wrist belt
12) Tool bag
13) Manual

2.3 Function interface

1		Menu key
2		Confirm key
3		Return : Return or cancel while setting parameters of the menu
4		4xzoom the image display.
5		Led
6		The RS485 data transmission and received indicator， it lights red while the data is being transmitted or received.
7		The power indicator: it lights red while the tester is powered on by the adapter

Top interface

Bottom interface

8	Video image /AHD/TVI/CVI signal input（BNC interface）
9	SDI input (BNC interface) **(Optional).**
10	HDMI IN. **(Optional)**
11	PoE power supply output/Lan test interface
12	DC12V 3A power output, for provisional DC power supply.
13	Micro SD card moveable，default 8G, support Micro SD card up to 32G.
14	LED lamp

15	Press more than 2 seconds, turn on or off the device, short press to turn on or off the menu display
16	DC 12V 1A charging interface.
17	RS485 Interface: RS485communication for the PTZ.
18	Audio input
19	UTP cable port: UTP cable tester port/ Cable tracer port.
20	VGA input **(Optional)**

3. Operation

3.1 Installing the Battery

The tester has built-in lithium ion polymer rechargeable battery. The battery cable inside battery cabin should be disconnected for safety during transportation!

Prior to the use of the instrument, the battery cables inside the battery cabin should be well connected. Pressing the key ⏻ continuously can power on or off the tester.

⚠Notice: Please use the original adaptor and connected cable of the device!

When the battery icon is full or the charge indicator turns off automatically, indicate the battery charging is completed.

⚠Notice: When the Charge Indicator 🔋 turns off, the battery is approximately 90% charged. The charging time can be extended for about 1 hour and the charging time within 12 hours will not damage the battery.

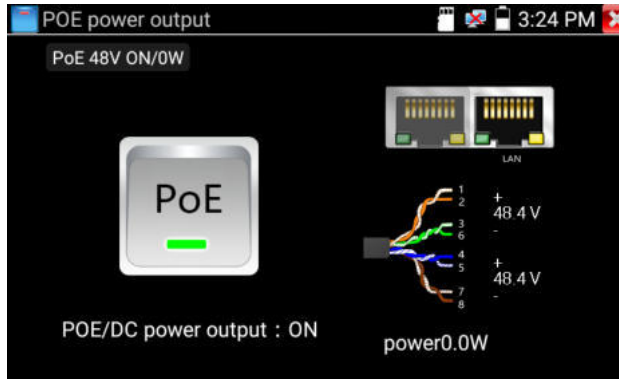

⚠**Notice:** Press the key ⏻ several seconds to restore the default settings when the instrument works abnormally.

⚠**Notice:** While Charging, someone must be present.

4. IP Camera Testing

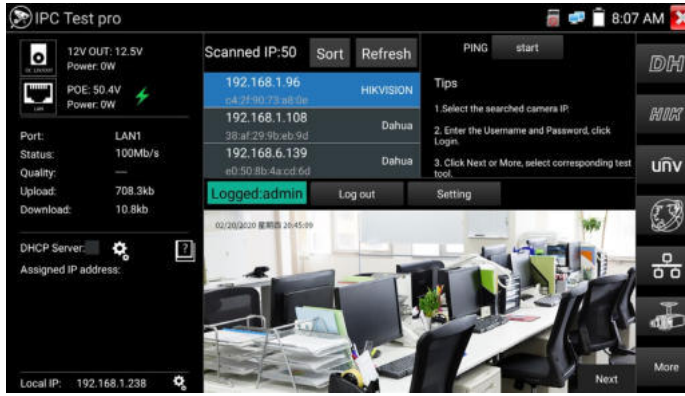

4.1 Power Camera

Camera can be powered from the DC 12V/3A output or by Power over Ethernet.

4.2 IPC Test pro

Camera test often need to open multiple apps, "IPC TEST PRO" app, using new technology and combine multiple functions to one APP, it can increase efficiency.

Application:

Support multi-segment IP address scan, can visual display camera manufacturer, click IP address to play the image.Connect IP camera, can supply the power to PoE camera.

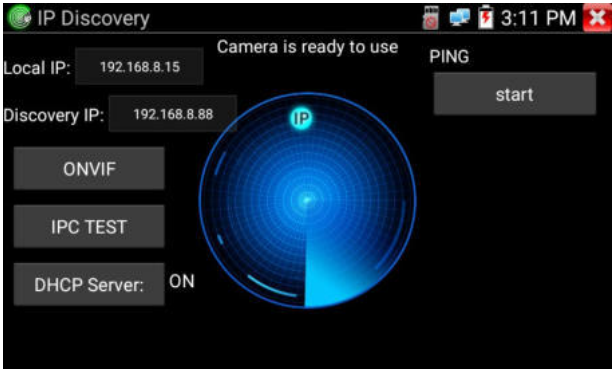

Real-time display network port connection status.

By one key to connect camera test tool, browser can login and configure camera.

Batch activate Hikvision and Dahua cameras.

4.3 IP discovery

Press IP discovery tester auto-scan the whole network segment IP, as well as auto-modify the tester's IP to the same network segment with the scanned camera's IP. The meter auto-search whole network segment IP, and auto- add the IP of different network segments.

Local IP: Tester's IP address, Tester can auto-modify the tester's IP to the same network segment with the scanned camera's IP.

Discovery IP: Connected tester equipment's IP address. If the camera connected to the tester directly, tester will display the camera's IP address, if tester connects to Local Area Network, it displays the current IP address.

Start: PING function, click "Start", can PING camera's IP.

ONVIF: Rapid ONVIF Quick link.

IPC TEST: IPC TEST Quick link, Non-Onvif IP camera test.

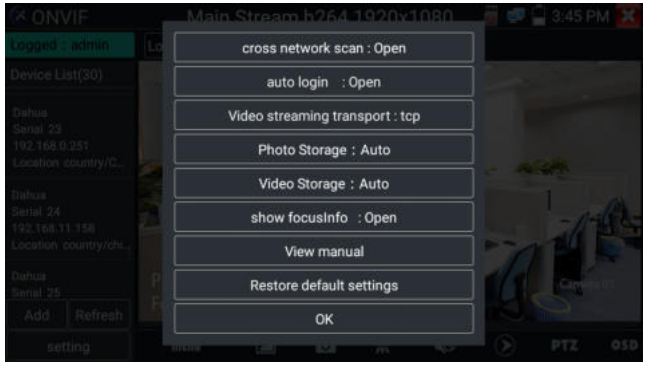

4.4 Rapid ONVIF test

Rapid ONVIF can display 8K H.265/4K H.264 camera image by tester's mainstream. The meter auto-scan all ONVIF cameras in different network segments. It lists cameras name and IP address on the Left of screen. Tester can auto login camera and display camera image. Factory default use admin password to auto login, if you modified the password, then default use the modified password to login.

Click the button “Refresh”, tester will scan the ONVIF camera again. Click the newly displayed ONVIF camera on the “Device List”. The tester will show the IP camera’s relative information and settings.

Pop-up settings menu when click the “setting” icon in the upper left corner.

Across network segments scan: After open this function, Rapid ONVIF function can across network segments to scan camera’s IP.

Auto Login: After open this function, tester can auto login camera and display camera image (The login password is the same with last time, the first time using password is the default password "admin")

Video transmission protocol: UTP and TCP protocol.

Show focusInfo: Focus Information.

View manual: Open Manual.

Restore Defaults: Revert “Rapid ONVIF” to default settings.

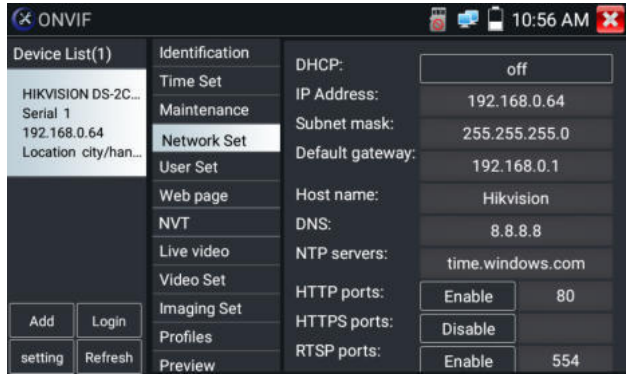

Confirm: Save the modified parameters.

Click “MENU” icon to open camera setting.

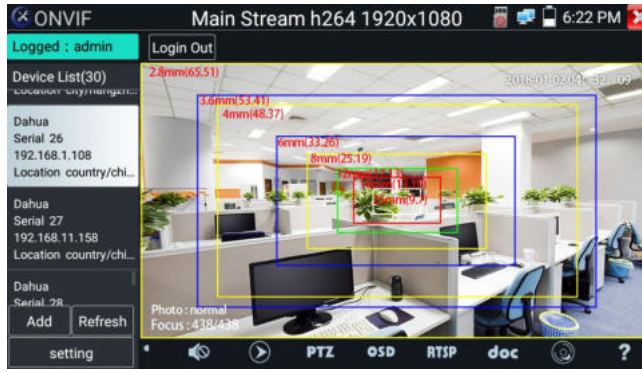

While in the “Live video” menu, click “Video Menu” at the top right of the image to access the following tools: Snapshot, Record, Photo, Playback, Lens simulation, PTZ and Settings.

Network setting: Click “Network Set” to change the IP address. Some cameras cannot support change IP address, so there is no change after saving.

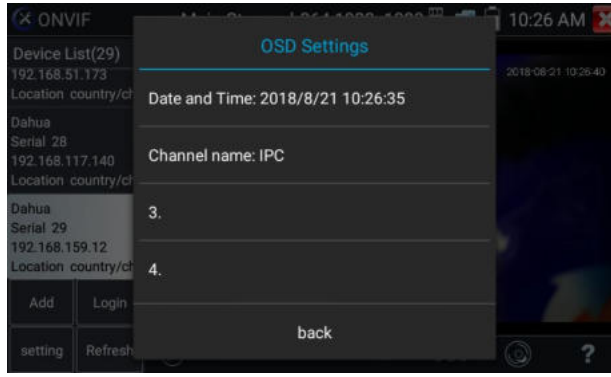

If it is network video input to the tester, as the tester supports resolution up to 1080p, the input image will be very clear after it is enlarged. This is greatly helpful for the installers to ensure the IP camera's video coverage and decide the IP camera's install site.

Lens simulation: Simulate different lenses display area, supported lens: "2.8/3.6/4/6/8/12/16/25mm", for choosing the suitable camera lens.

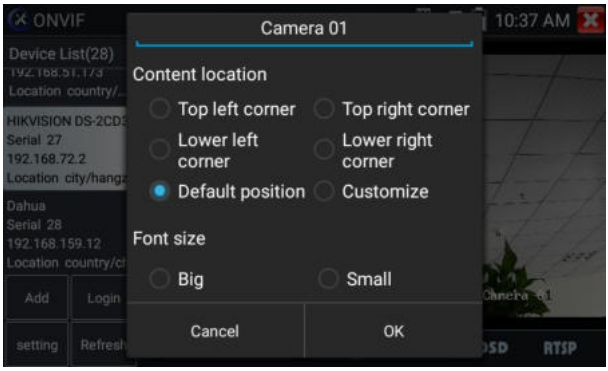

OSD Menu: Select OSD and popup the OSD menu. include time, channel name and other optional items.

After channel selecting, you can edit the channel name, modify the display position, and switch the font size. Select "default location" in "content location" is without modification. Select "Customization" to arbitrarily adjust the channel name and

display location. Click “OK” and the effects will appear. Press return key or click any area of the screen to return to the upper layer of the interface.

Video files can play in the Video player on the main menu.

PTZ

Set preset position: Move the camera to preset position, enter the preset number on the Bottom right corner to complete position preset.

Call the preset position: Select the preset number on the left, click "Call" to call preset.

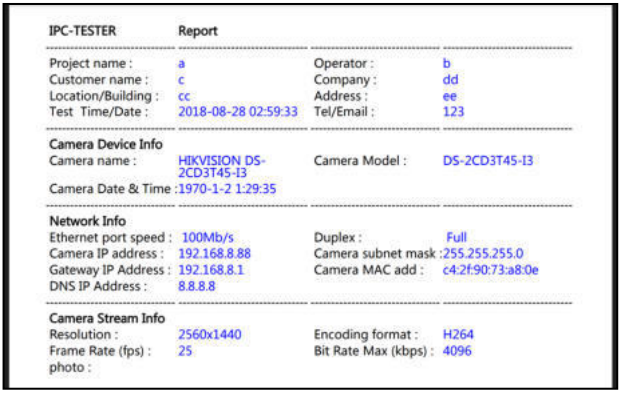

PTZ Speed set: Horizontal and Vertical Speed set.

Doc: Auto generate test reports document of camera, click "Create document". Click Preview to view the report document

Enter the camera test information, click "Create Document" to complete the report. Click doc menu again, you can preview the report document.

4.5 Non-Onvif IP camera test

Display image from the 8K H.265 camera by mainstream.

⚠ Note: Currently, the IPC Test App only supports some brands' specific IP cameras, these include specific models made by ACTI, AXIS, Dahua, Hikvision, Samsung, and many more. If the camera is not fully integrated, please use the ONVIF or RTSP apps.

Local IP: This is the tester's IP address. Click "Edit" to enter "IP setting" and change the tester's IP address settings.

IP camera type: Click on the IP Camera type to select the Manufacturer and model number of the integrated IP camera.

Manual: Click IP camera type, list Honeywell, Kodak, Tiandy, Aipu-waton, ACTi, WoshiDA IP camera etc. If the brand has offered official original protocols, pls select camera type, input IP camera address, user name and password, click "official" to enter the camera image display interface.

Stream code: When test camera via RTSP, you can select mainstream or sub stream to test (if camera's RTSP have not been start or without, it will tip "auto match" fail, please witch to manually selecting.

IP Camera's IP: Enter the IP camera's IP address manually or click "Search" to auto-scan for the IP camera's IP address. It is better to directly connect the IP camera to the tester so the search results will only display the camera's IP address.

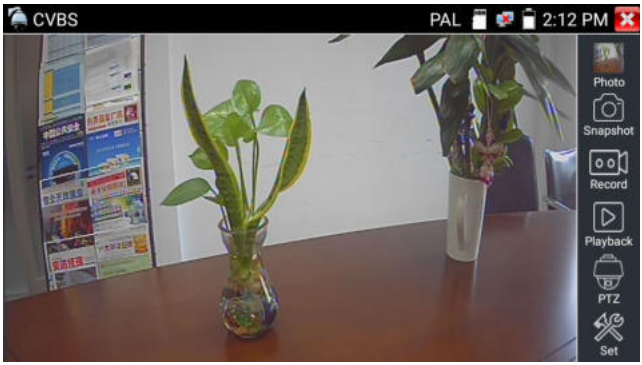

IPC Port: When you select the IP camera type, it will default the camera's port number and doesn't need to be changed.

After all settings are completed, click "Enter" to view the live video.

5. Analog Camera Testing

5.1 Analog camera test

Analog camera test and PTZ control.

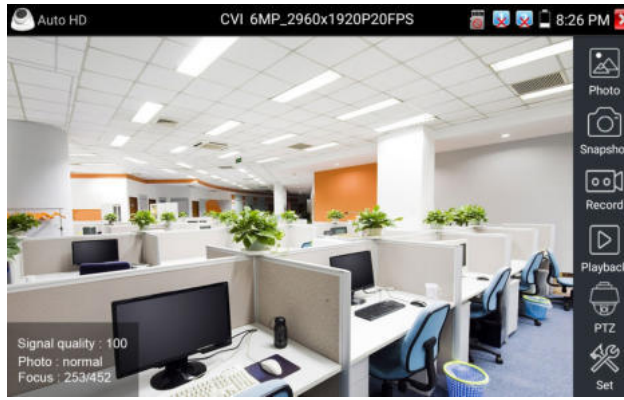

⚠ Check and set the protocols, address, interface and baud, all must be consistent with the dome camera, then the IPC tester can test. After setting the parameter, the tester can control the PTZ and lens.

5.2 AutoHD

Auto-recognize the resolution and image display of Analog and HD cameras. Support coaxial PTZ and call OSD menu. Support CVBS and 8MP TVI/CVI/AHD cameras.

Select relative function on the right side toolbar to operate, functions including "Photos", "Snapshot", "Record", "Playback", "PTZ", "Set".

Double-taps on the screen to make the image displayed full screen.

5.3 CVI camera test

When HD CVI signal input, the tester will display the image resolution on the top bar.

Double-taps on the screen to make the image displayed full screen.

The tester supports resolution support up to 3840 x 2160P 12.5/15 FPS.

（1）PTZ control

1.1 Coaxial PTZ control

Click the icon“PTZ”on the right toolbar to do the corresponding setting.

“Port”: select coaxial control

Enter PTZ address to perform parameters setting.

The PTZ address in the tester must be consistent with the dome camera or decoder, then the IPC tester can test. After setting the parameter, the tester can control the PTZ and lens.

Set preset position:

Move the PTZ camera to the preset position, the Tap it and input preset position number. Tap “Set position” to complete set preset position.

Call preset position:

Tap the preset position area, input preset position number. Tap “call position” to complete call preset position.

1.2 RS485 control

（2）Coaxial camera menu setting

Input calling dome camera menu address code, you can press the key “Enter” or click the icon  to call the dome camera menu.

set the parameters by 

5.4 TVI camera test

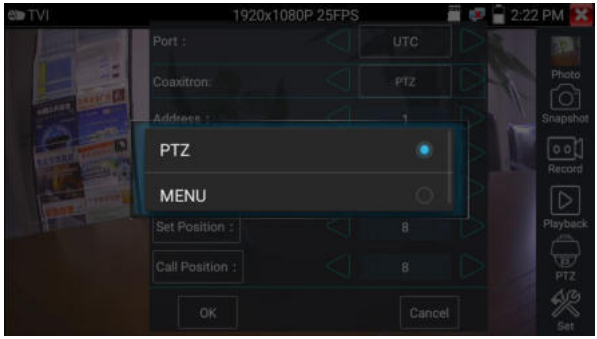

When HD TVI signal input, the tester will display the image resolution on the top bar.

Double-taps on the screen to make the image displayed full screen.

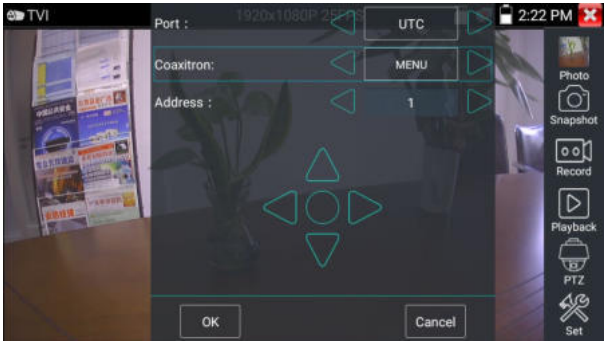

The tester supports resolution support up to 3840 x 2160P 12.5/15 FPS.

Coaxial camera menu settings:

Tap icon “UTC”, select “menu setting” to enter the dome camera menu.

Input calling dome camera menu address code, after finishing the parameter settings, you can press the key “Enter” or click the icon  to call the dome camera menu.

5.5 AHD camera test

When AHD signal input, the tester will display the image resolution on the top bar.

Double-taps on the screen to make the image displayed full screen.

The tester supports resolution support up to 3840 x 2160P 15 FPS.

(1) Coaxial PTZ control

UTC control: select “PTZ control or PTZ control-2” (AHD camera has two different order, if select “PTZ” cannot control, pls go “PTZ-2”)

If to coaxial PTZ control the AHD camera, no parameters setting is needed.

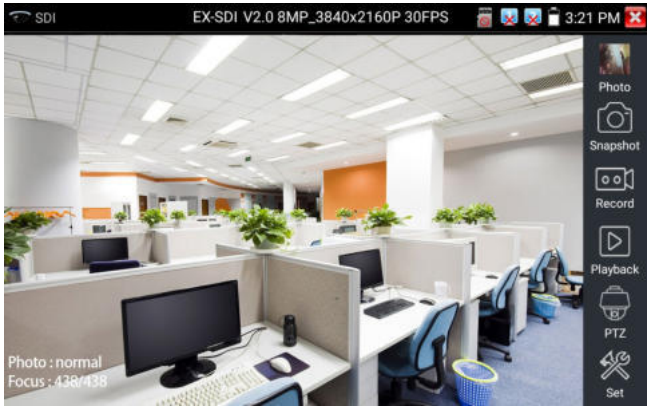

5.6 SDI/EX-SDI Camera Test (*Optional)

When tester receives SDI camera image, it will display the image data.

Double-taps on the screen to make the image displayed full screen.

The tester supports resolution up to 8MP, as follows:

1280x720P 25Hz/1280x720P 30Hz/1280x720P 50Hz/1280x720P 60Hz/1920x1080P 25Hz/1920x1080P 30Hz/1920x1080I 50Hz/1920x1080I 60Hz/2560 x1440P 25/30FPS/3840 x 2160P 25/30 FPS

IPC tester's HDMI output port can be used as SDI to HDMI converter, output HD SDI image to HD TV monitor.

Select relative function on the right side Toolbar to operate, "Snapshot", "Record", "Photos", "Video playback", "PTZ control", "Video Brightness and Storage set".

6. Video signal input

6.1 HDMI IN (*Optional)

When tester receives HDMI in image, the top tool bar shows the resolution of this image. You can select "resolution" to set resolution in the setting menu. Tap screen by twice, full image display. Support resolution upto 4K 30FPS，

3840x2160P 30FPS，720×480p /720×576p /1280×720p /1920×1080p /1024×768p/1280×1024p /1280×900p /1440×900p

(1) Snapshot

Click the icon "Snapshot", when the video in, to take a picture and save the current video frame in the SD card as JPEG file.

If the unit is set to the manual mode an "Input Name" pop up box will appear and you can enter a title for the snapshot. If the unit is set up to automatically set file names, this box will not pop up.

(2) Video record

When you click the "Record" icon, video starts recording. A red recording icon appears on the screen and begins to flash and a timer appears indicating the time elapsed for the video. Click on the "Record" icon again to stop recording and save the video file to the SD card.

(3) Photo

Click the icon "photo" to enter, click the selected thumbnail photo to display it on the screen. Double-tap the image you want to view to make it full screen. Double-click again the photo to return.

To rename or delete an image, click and hold on the file until this screen below appears

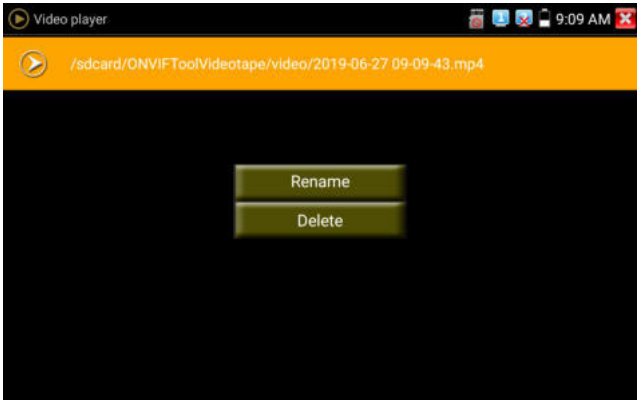

Click  to close and return to PTZ controller.

(4) Recorded video playback

Click the "Playback" icon to view your recorded videos. Tap on the video file image you want to watch.

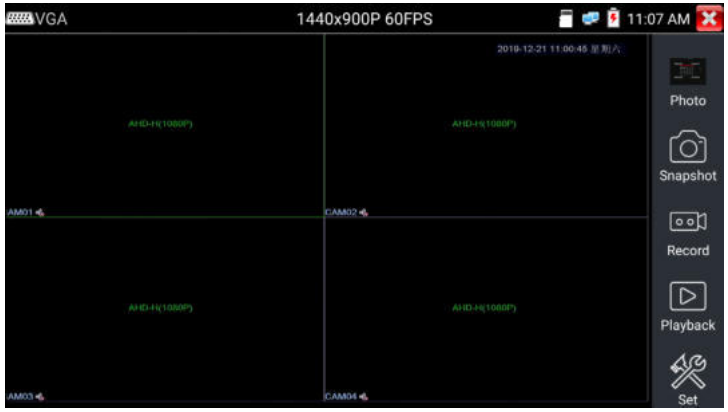

To rename or delete a video, click and hold on the file until this screen appears:

Video files also can play in the main menu "Video Player".

6.2 VGA IN(*Optional)

When tester receives VGA in image, the top tool bar shows the resolution of this image. Tap screen by twice, full image display. Support resolution as bellow：1920x1200P 60FPS、1920x1080P 60FPS、1792x1344P 60FPS、1680x1050P 60FPS、1600x1200/900P 60FPS/1440x900P 60FPS、1360x768P 60FPS、1280x1024/960/800/768/720P 60FPS、1152x870P 60FPS、1024x768P 60FPS、800x600P 60FPS、640x480P 60FPS.

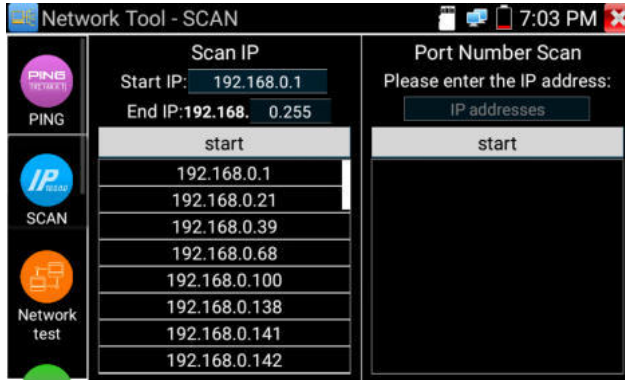

It supports “Snapshot”, “Record”, “Photos”, “Video playback”.

7. Other function

7.1 Network tool

(1) IP address scan

Connect the cable to the LAN port, click icon to enter, set your IP address search range by changing the Start and End IP addresses. Click the “Start” button to scan the IP address range. You can also input an IP address in the Port Number Scan to scan for open ports.

(2) PING Test

Application: PING testing is the most conventional network debugging tools. It is used for testing if the connected. IP camera or other network equipment's Ethernet port is working normally and the IP address is correct.

It's normal that the first data packet will be lost when test start.

(3) Network test (Ethernet bandwidth test)

To use the Network tester, you will need two IP testers. One is used as a Server and the other as a Client. Both devices must be on the same network segment in order to communicate.

(4) Port Flashing

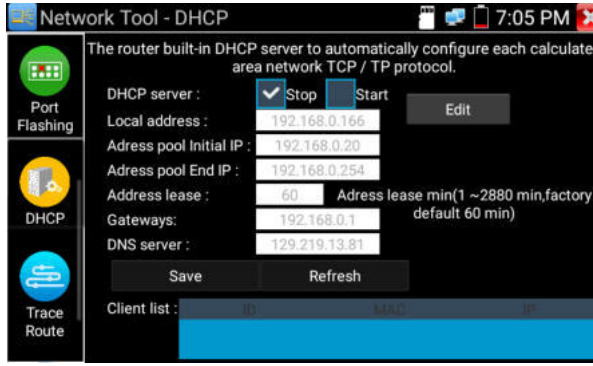

Application:

The tester will send special signals to make the connected LAN port flicker at special frequency, which will enable the installers to easily and quickly find the connected Ethernet cable. This function can prevent mistakenly insertion or disconnection non-corresponding cable to artificially interrupt network connection.

(5) DHCP server

Click on the DHCP icon to open the DHCP server app. Select the "Start" check box at the top and make any desired changes to the network settings. Click "Save" to start assigning dynamic IP addresses for IP cameras and other networked devices. Click the

“Refresh” button to check your Client list.

(6) Trace route

It is used to determine path of the IP packet access target.

Note: Trace route testing results only for reference, for accurate test route tracking, Pls use professional Ethernet tester.

(7) Link monitor

This app is used to see if an IP address is occupied by other network devices. This will avoid new address conflicts.

7.2 RJ45 cable TDR test

Connect cable to tester’s LAN port, click icon “ ” to enter app.

Single test: Test cable status, length and attenuation.

Repeat test: Continue to test cable status, length and attenuation.

Status: After link up, screen display “online”, if not link up or open circuit, screen display “open circuit”, if cable pair is short circuit, screen display “short circuit”.

Length: The max test length is 180 meters, when cable is open circuit or short circuit, can test the cable length, if screen display “online”, the testing result would be not accurate.

Cable quality test: Green is good quality cable, Yellow is Poor quality cable, Red is water poured cable, the attenuation value will be displayed when cable over 10 meters.

Advanced Test: Test cable pair status, length, attenuation, reflectivity, impedance, skew and other parameter.

Attenuation reflectivity: After link up, if reflectivity value is 0, it is the best quality communication

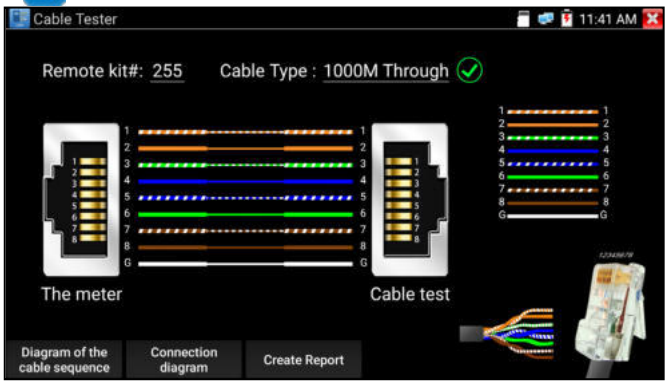

Impedance: After link up, if the impedance value is 100 Ω,it is the best quality communication, the range is generally in 85-135 Ω

Skew: After 1000M link up, when skew value is 0ns, it is the best quality communication, if over 50ns, will cause a Bit Error Rate in the transmission.

Click “Help”, check the instruction of all parameters.

7.3 Cable Test

Click icon  to enter.

Test LAN cable or telephone cable.

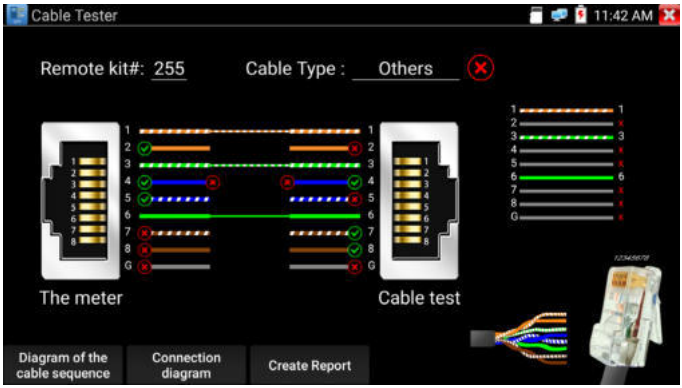

Connect LAN cable or telephone cable with the CCTV tester and cable tester. And then the

connecting status, cable type and the sequence of wires as well as the serial number of the cable tester kit will be displayed.

The number of the cable tester is 255.

If need several different number other types cable testers, should pay the additional cost.

Quickly detect the near-end, mid-end and far-end fault point of the.

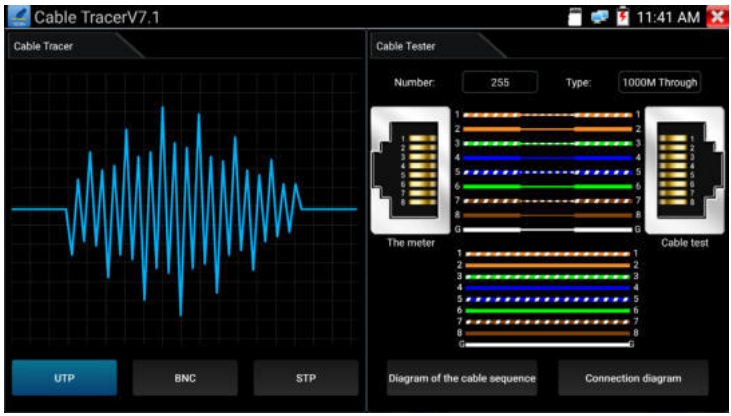

Cable test:

Tap "cable test sketch map", pop up Straight-through cable and crossover cable sketch, It is for line sequence reference, when the crystal on the first pressure in the twisted-pair.

7.4 Cable Tracer (* Optional)

Connect UTP cable or telephone cable to tester bottom port “UTP/SCAN”, or use adapters and cables to connect other cables, such as BNC cable. Or use BNC adapters and alligator clip cable to connect BNC cable etc.

Note: if use BNC adapters and alligator clip cable to connect BNC cable etc. Please switch to “BNC mode”, if connect shielded cable, please select “STP mode”.

UTP mode is used for searching the normal network cable or other cables. “BNC mode” for finding BNC cable after connecting adapter .STP mode is used for searching the shielded network cable.

Rotating the switch of cable tracer to turn on. Clockwise rotation increases sensitivity, anticlockwise rotation reduce sensitivity.

Cable tracer and Cable tester can be tested at the same time. It is better to judge whether the search network cable is accurate. Connect the other end of the tested network cable to the "UTP" port of cable tracer, the cable sequence, continuity, test box number and network cable type will be displayed on the right side of the meter interface. The "G" indicates the continuity of the shielded network cable.

The 1-8 indicators of cable tracer will flash according to the cable sequence. The DIRECT / CROSS / OTHER three indicator lights display the type of network cable directly.

Press the "MUTE" button of cable tracer for 2 seconds. After the "Di" sound, the silent mode is turned on. In the silent mode, can judge cable type according to the indicator light. Press the "MUTE" button again to exit the silent mode.

Application

It's convenient for people to find out the other end of the cable from the messy cables in security maintenance and network engineering.

While searching BNC cable, connect one port of the alligator clips to the copper core or copper net of the BNC cable, the other one to connect the earth wire (barred windows).

⚠ Note: The battery of the cable tracer must according to corresponding positive pole + and negative pole -, otherwise will damage the tester.

⚠ Note: While the cable tracer tester is receiving the audio signal from the tester, it may be influenced by other signals and make some noise.

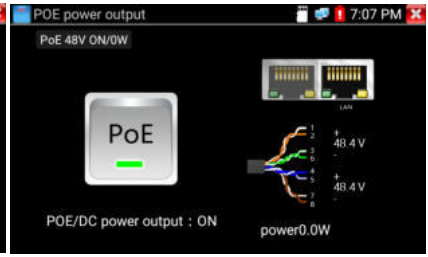

7.5 PoE power / DC12V 3A power output

When the tester is turned on, the DC12V power output functions are automatically turned on.

To use the PoE Power Output function, change the switch “ON” or “OFF”.

The IP camera needs to be connected to the LAN port before you turn PoE Power on. If the IP camera Supports PoE, the PoE power is delivered via pins 1, 2, 3, and 6 on the LAN port. The IP tester will display “48V ON” at the top of the screen when the POE power is still on.

⚠**Note:**

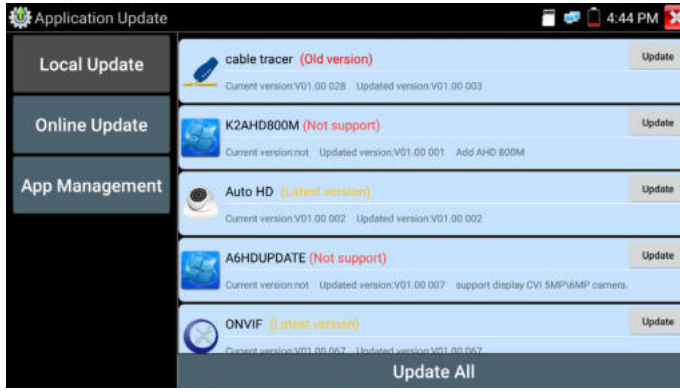

1. Don’t input power into the “DC12/3A OUTPUT” port.
2. Don’t output this DC12V/3A power to the DC12V/IN port of the IP camera tester to avoid destroy.

3. The IPC tester power output i s close to 3A, if the IP camera's power is over 3A, the tester will auto enter protection mode. Disconnect all the connections of the tester and then connect the tester with power adaptor to resume the tester.
4. Before turning on the PoE power output, please make sure the IP camera supports PoE power. Otherwise it may damage the IP camera.
5. Make sure you plug in your IP camera to the LAN port prior to turning on PoE power
6. Make sure the tester is full charged or more than 80% charged, otherwise the tester will shows "low power", "not able to supply power".

7.6 Update

Copy the downloaded update file to SD card "update" directory, if no directory, please create one.

Click the  icon to open the Update menu. Select "Local Update" to update via the SD card or select "Online Update" to check for updates on the internet. If there are applications that need updating, the applications will be listed in the interface, click related applications, update to the latest version.

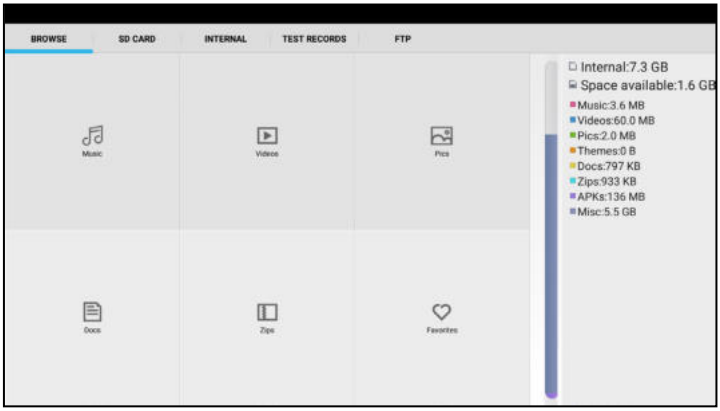

Online update: Connect the Internet to update the apps.
App management: This can unistall and open APP.

7.7 File explorer

Click “File” on the top bar tool, can select internal or external storage. Click on the upper right corner Icon “...”. will pop-up menu, you can select other operation or exit.

Browse

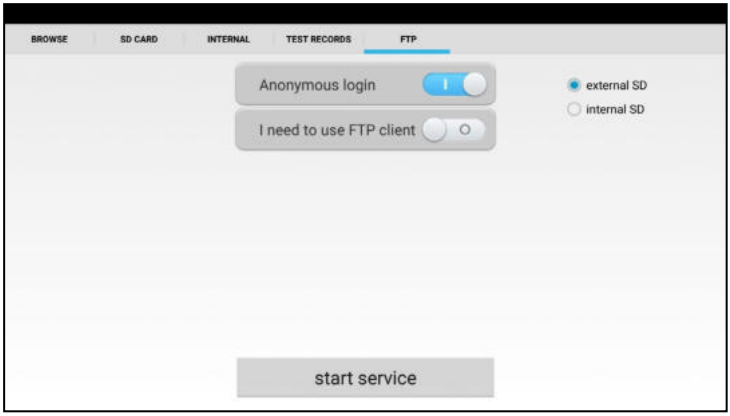

It includes Music, Videos, Pictures, Documents, zip file etc. It is convenient to view and manager.

FTP server

You can choose internal or external SD card.

Other operation details, Pls refer to FTP settings.

7.8 System Setting

Language: Select your desired language: English, Chinese, Korean, Russian, Italian, Polish, Spanish, French or Japanese.

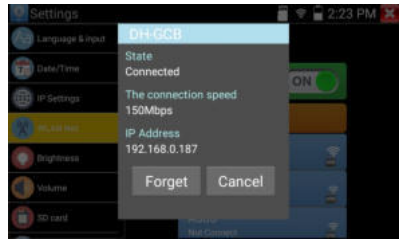

Typewriting: You can select typewriting or install other typewriting:

Date/Time: Set the Date/time of the IP tester.

IP setting: Manually set the IP address, Subnet Mask, Default Gateway and DNS address or select “Dynamic allocation” to use DHCP. To test multiple network segments, click “Advanced” and then click “Add” to enter another IP address for the IP tester.

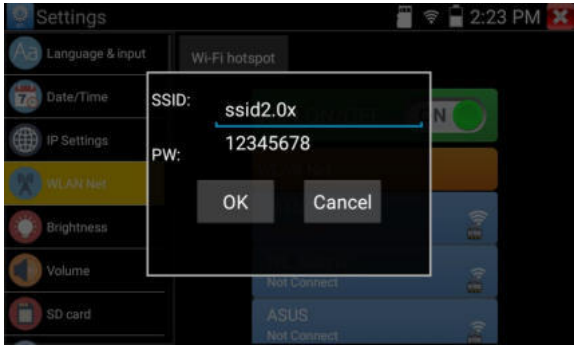

WLAN Net: Turn WiFi off or on by pressing the “Open the wifi” button. Once WiFi is turned on, and click connected WIFI, it will scan for wireless networks in your area.

Select and press “WIFI” several seconds, to set static IP address.

Wi-Fi hotspot: input “SSID” name and “password”, and then click “ok” to create Wi-Fi hotspot.

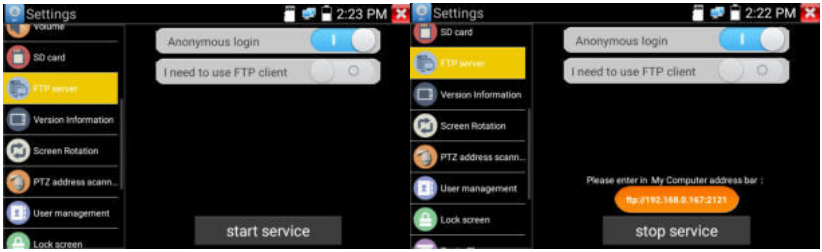

Brightness: Set the desired brightness of the IP tester and adjust the sleep time settings.

Volume: Set volume level

SD Card: Displays SD Card Capacity. You can also format the SD card or umount it before removing it.

FTP server: Once the IP tester connects to a network, a computer can be used to read the SD card files via FTP.

Start the FTP server and then input the tester’s FTP address in the PC’s address bar. This will enable the PC to read, copy and edit the files from the SD card without the use of SD card reader.

Version information: Shows applications version information, if press any apps icon several seconds to uninstall.

Screen display rotation: Click on “Screen Rotation” to flip the IP tester’s display 180 degrees. This function is very convenient for the user to connect the LAN cable on the bottom of the unit without having to flip the unit itself.

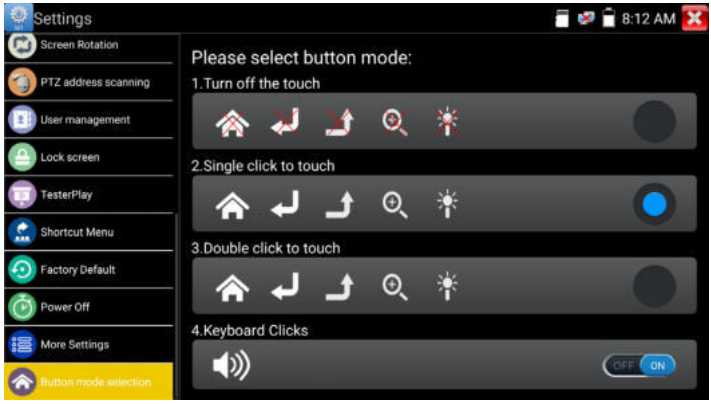

PTZ address scan: You can toggle the PTZ Address scan off or on before entering the “PTZ controller” app. This needs to be turned on in order to use the PTZ Scan feature of the PTZ app.

Lock Screen: The meter default is not locked. You can choose password Lock screen, pattern Lock screen or “NO”.

Restore the factory settings: If the tester to restore factory settings, all your personal files and apps will be removed.

Power Off: Manully to set the power off after hibernation time(0-23h 59min).

Button mode selection: It can select button mode .

Specifications:

Product	Multi-function Network Cable Tester	
Model	26031	26032
Variation	Without Cable Tester	Including Cable Tester
Display	New 5.4 inch IPS touch screen, 1920×1152 resolution	
CVBS	1 channel BNC input, NTSC/PAL (Auto adapt) PTZ control, RS485 control, Baud 600-115200bps, compatible with more than 30 protocols such as PELCO-D/P, Samsung, Panasonic etc	
IP camera test 8K/H.265/H.264	IP Discovery/Quick ONVIF/IPC test /RTSP play /Client APK	
Rapid Video	Auto view the video, create testing report	
HIKVISION test tool	Support batch activate HIKVISION cameras and modify IP address, modify password etc. Self-defined modify channel name, can quickly change H.264 and H.265 video, open wide dynamic mode. Factory restore, etc.	
DAHUA test tool	Support batch activate DAHUA cameras and modify IP address, username and password. Self-defined modify channel name.	

Product	Multi-function Network Cable Tester	
Model	26031	26032
HD Coaxial test	8MP TVI camera test, 3840 × 2160P 12.5/15 FPS, UTC control/ call OSD menu/ TVI intercom/ TVI coaxial audio test	
	8MP CVI camera test, 3840 × 2160P 12.5/15 FPS, UTC control / call OSD menu/ CVI coaxial audio II test	
	8MP AHD test, 3840 × 2160P 15FPS, UTC control / call OSD menu	
	Auto HD app, auto recognize HD coax camera type and resolution, support snapshot, video record& playback, coaxial PTZ & call OSD menu	
HDMI input	1 channel HDMI input, support 4K 30FPS. The resolution as follow: 4K_3840 × 2160/2K_2560 × 1440P/ 1920×1080P /1920×1080i /720×480P / 720×576P /1280×720P/1024×768P/ 1280×1024P /1280×900P /1440×900P, etc	
VGA input	channel VGA input, support 2048 × 1152 60FPS. The resolution as follow: 2048 × 1152P/ 1920 × 1200P 60FPS/1920×1080P 60FPS /1792×1344P 60FPS /1680× 1050P 60FPS/(1600×1200P/900P 60FPS)/ 1440×900P 60FPS/1360×768P 60FPS/ (1280×1024/960/800/768/720P 60FPS)/ 1152×870P 60FPS/1024×768P 60FPS/ 800×600P 60FPS/600×480P 60FPS.	
Zoom Image	4x zoom, to enlarge image, Screen snapshot, record, save, view and record and play back	
12V/3A power	Output DC12V/3A power out, supply temporarily power for the camera	

Product	Multi-function Network Cable Tester	
Model	26031	26032
12V/3A power	Output DC12V/3A power out, supply temporarily power for the camera	
PoE power output	48V PoE power output, max power 25.5W	
Digital Cable tracer	Search BNC cable, network cable and telephone cable from the mess cables. Cable search and UTP cable can test at the same time	
UTP cable test	Test UTP cable connection status and display on the screen. Detect the near-end, mid-end and far-end fault point of the RJ45 cable plug.	
RJ45 TDR cable test	Test cable pair status, length, attenuation, reflectivity, impedance, skew, can create test report. Max measurement is 180M.	
TesterPlay	Screen projection: Tester, mobile phone and PC display at the same time (For android version mobile phone)	
Network test	Trace route, Link monitor, DHCP server, port flashing, Ping test	
Wi-Fi	Built in WIFI, speeds 150M, display wireless camera image	
Audio test	1 channel audio signal input, test whether sound normal	
Power management	Display DC 12V input & output voltage and power in real time	

Product	Multi-function Network Cable Tester	
Model	26031	26032
Data monitor	Captures and analyzes the command data from controlling device, also can send hexadecimal	
External power supply	DC 12V 1A	
Battery	Built-in 7.4 V /3350mAh Lithium ion battery	
Rechargeable	After charging 3-4 hours, normal working time 5 hours	
Operation setting	OSD menu, select your desired language: English, Chinese, Korean, Russian, Italian, French, Polish, Spanish, Japanese, Turkish, Deutsch, Serbian, Czech, Vietnamese etc	
Auto off	1-30 (mins)	
Working Temperature	-10°C---+50°C	
Working Humidity	30%-90%	
Dimension/Weight	183mm x 110mm x 36.5mm / 0.8kg
